Confirmation of your registration
will be sent via automated email

The aim of the Learning Program is to improve patient outcomes in Subacute Care (SAC) through the delivery of evidence based, coordinated care by embedding a culture of clinical excellence within SAC services and developing workforce skills and knowledge.

Learning objectives (you can attend single sessions):

Principles of Rehabilitation

Understand what subacute care is and how it differs from acute care, how to incorporate the key principles of rehab into everyday practice.

Person Centred Care

Understand the principles of person centred care and explore strategies to improve care within the workplace.

Motivational Interviewing

Practice and understand the main concepts of MI. How our values shape our motivation, identify stages involved in behaviour change.

Goal Setting

Explore person centred, value based, participatory goal setting and gain knowledge, tools and resources to improve goal setting practices.

This training is suitable for any allied health, nursing, medical and support staff working in rehabilitation, geriatric evaluation and management.

Training is available free to WA Health employees, including staff from SJOG Midland and Mt Lawley, and Peel and Joondalup Health Campuses. If you work outside WA Health, please contact us at: tracsWA@health.wa.gov.au to discuss options to access our training.

TRACS WA may film/record/photograph this event for educational and promotional purposes. Please advise TRACS WA if you do not wish for your image and voice to be used in this way.
