by 10th March 2021

**Please note, this event will take
place via MS Teams.**

**The invite will be sent to you
following registration.**

This virtual education event is intended for health professionals in any health, aged care or disability services.

It will include a brief overview of:

- Tracheostomy management and considerations related to COVID-19
- Online educational resources and face to face training to support the management of a person with a long-term tracheostomy.

The main focus will be on:

- Case studies of complex tracheostomy management in the community (including WACHS): communication and collaboration across service providers.

Statement of purpose: The WA Community of Practice in Subacute Care will provide a supportive, interdisciplinary forum for the sharing and exchange of skills, knowledge and resources in subacute care, with the aim of improving practice and the delivery of quality, patient centred care. (Created 2012). TRACS WA may film/record this event for educational and promotional purposes. Unless you advise TRACS WA otherwise, we will assume you consent to your image and voice being used in this way.
